EZX Experiences Record Growth During Down Economy

WESTFIELD, NJ, *February 02, 2009 /24-7PressRelease/* -- EZX Inc, a leading provider of financial software and services announced today that overall 2008 was a banner year for revenue growth. With Q4 setting the record for the single highest increase in EZX's history.

"This shows that the industry, in general, requires more effective solutions, and wants better value for their technology dollars," said CIO Greg Nadan. "We are being noticed more and more because we deliver electronic trading solutions that the market really needs, at the price points they are demanding."

Paul Savin, CEO of EZX remarked, "Providing and meeting these new requirements is EZX's mission. This is what we have been doing all along, even during the booming economy."

EZX's complete suite of buy-side and sell-side trading products was a major contributor to the stellar growth they experienced.

During 2008 EZX made significant improvements to its flagship iServer™ product to reduce latency, increase security, and overall functionality. Other major changes were also made to their powerful and flexible client front-end EZoms™, including support of 2 more market data providers, improved Sell-Side support, and much more...
